**colors, hearing**, 224  
**Columbia University**, 324  
**comfort**, job satisfaction and, 118  
**commitment**: of groups, 559; as personality trait, 442–43  
**common traits**, 411  
**communication**: gender differences in, 112; groups and, 557; Levitt's network system of, *d564*; nonverbal. *See* nonverbal communication; patterns in groups, 561–62  
**communication process**: the audience, 604; the channel, 604; the message, 603; persuasion and, 602; source of messages, 602–03  
**companionate love**, 544  
**companionship**, anxiety and, 525–26  
**comparable worth**, 118  
**competency theory**, 328–29  
**complementarity**, 531  
**compliance**: attitude change and, 594–95; minority dissent in groups and, 567  
**Comprehensive Drug Abuse Protection and Control Act of 1970**, 197  
**compromise**, in politics, 540–41  
**compulsions**, 462  
**compulsive**, 302  
**computer-assisted instruction (CAI)**, 260  
**computerized axial tomography (CT)**, 160, 161, 162  
**computers**: in brain scans, 161–62; in chess, 301; problem solving with, 298; teach to think like children, 68; in testing, 366–67  
**concept**, imagery and, 293  
**concrete operations**, 63  
**conditioned response (CR)**, 237, 238, *t241*  
**conditioned stimulus (CS)**, 237, 238  
**conditioning**, attitude and, 588–89  
**conditions of worth**, 400  
**cones**, sight and, 211  
**confabulation**, 281  
**conflict**, 381; cognitive, 596  
**conflict situations**, 422, *t422*  
**conformity**, 101; group norms and, 569; obedience and, *cr569*; refusal, 573  
**conformity, groups and**: Asch conformity experiments, 566, *d566*; minority dissent and compliance, 567; pressure to conform, 565  
**consciousness**, 383, 412–13

## Cultural Formation Interview (CFI)

**consciousness**, 180, 181  
**conservation**: principle of, 62; type of, *t62*  
**constancy**, 227  
**constriction**, biofeedback and, 191  
**consulting psychologist**, 621–22  
**contact comfort**, 66  
**contemporary approaches to psychology**: behaviorists, 13; cognitivists, 13; defined, 12–13; humanists, 13; psychobiologists, 13; sociocultural psychologists, 14  
**content validity**, 366  
**contingencies of reinforcement**, 394  
**contingency management**, 510  
**continuity vs. discontinuity**, 96, 223  
**continuous schedule of reinforcement**, 247  
**control**: in experiments, 31; personality trait, coping with stress, 442–43  
**control group**, 31–32, 339–41; blind studies, 34–35; defined, 31  
**conventional morality**, 95  
**convergence**, 227  
**convergent thinking**, 294  
**conversion disorder**, 467  
**cooperation, group**, 579–81  
**coping mechanisms**, 432. *See also* stress, responses to  
**coping strategies**. *See* stress, defensive coping strategies  
**coronary artery disease**, 435  
**corporal punishment**, 72  
**corpus callosum**, 154, 155, 163  
**correlation**, defined, 31  
**correlational study**, *g30*  
**correlation coefficient**, 44–45  
**cortex**, 186  
**cortical steroids**, 165  
**counseling psychology**, 18  
**counterattitudinal behavior**, 596  
**counterconditioning**, 508–10, *d508*  
**creative thinking**, 294, 356; flexibility, 299; insight, 299; recombination, 299  
**creativity**, problem solving and, 299  
**crisis hotline adviser**, 619–20  
**crisis intervention programs**, 619  
**cross-sectional study**, 30  
**crowding**, 425, 426  
**crystallized intelligence**, 134  
**cues**: biological, emotion and, 340; biological, obesity and, 324, 325  
**cultural bias**, in intelligence tests, 359, 361–63  
**cultural characteristics**, of stress, *t445*  
**cultural differences**, language and, 308–10  
**cultural diversity**, 20  
**Cultural Formation Interview (CFI)**, 457–58; culturally sensitive research, 35

## culture(s)

**culture(s)**: attitude formation and, 589; collectivist, 571; defined, 362, 457, 458; emotion and, 340; ethno-cultural approach, to mental health, 580; fundamental attribution error and, 536; individual and, 20; learning and emotion, 337; obedience and, 572; personality and, 402, 404–05; personal space and, 539; socialization and, 72–73; threatening facial elements and, *d336*  
**curves**, 42  
**cyberbullying, suicide and**, 480  
**cystic fibrosis**, 172

## D

**data**, distribution of, 41; gathering, 25, 30  
**day care**, infant attachment and, 67  
**daydreaming**, 185  
**deafness**, 216  
**death**: adjusting to, 139; divorce as, 548; grief and, 140–41; hospice care, 140; stages of, 138–39  
**decay**, 283  
**decibel levels**, *c215*  
**decibels**, 215  
**decision making**, 295–96; decision tree, *d296*; in groups, 560–61; individual vs. crowd, 610–11; obstacles to, 296  
**declarative memory**, 273  
**deduction, thinking**, 294  
**Deep Blue** (computer), 301  
**deep processing**, of memory, 275  
**defense mechanisms**, 387–89  
**degenerative brain disease**, 161  
**deindividuation**, altruism and, 582  
**deinstitutionalization**, 516, *g517*  
**delirium tremens**, 486  
**delusions**, 472  
**dementia**, 134; frontal lobe, 159  
**dementia praecox**, 476  
**democratic leadership style**, 564  
**democratic parenting style**, 70  
**dendrite**, 149–50  
**denial**: coping with stress and, 441; defense mechanisms, 387; stage of dying, 138–39  
**dependent variable**, 31  
**depressants**, 197  
**depression**: antidepressant medication, 515; childhood trauma and, 168; gender and, 474; in middle-aged women, 130; obesity and, 324; in older adults, 133; postpartum, 166; stage of dying, 139; suicide and, 479–80; in teens, 103–04  
**depressive phase**, bipolar disorder, 479  
**depth perception**, 226–27, *d226*  
**descriptive statistics**: about, 40–41; correlation coefficients, 44–45; defined, 41; distribution of data, 41; measures of central tendency, 42–43; measures of variability, 44  
**descriptive studies**, observation and, 31  
**desensitization**, 259  
**deterioration in normal movement**, 473  
**development**: child abuse and, 71–72; cognitive, 60–64; fetal, 53–54; issues with, 71; language, 57–58, 305–10; maturation, 55–56; newborn, 54; nutrition and brain, 160; perceptual, 56; social, 72–75  
**developmental disorders**: Asperger's Syndrome, 477; autism, 477; defining, 476; pervasive developmental disorders, 477  
**developmental friendship**, 116  
**developmental health**, public service and, 74  
**developmental psychology**, 52, 53  
**deviation, standard**, 44  
**Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-V)**, 454, 455  
**Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV)**, 414  
**diagnostic criteria**, 455  
**diathesis-stress hypothesis**, 475  
**difference threshold**, 206, 207  
**differential diagnosis**, 455  
**diffused adolescents**, 98  
**diffusion of responsibility**, 581–82  
**directed thinking**, 294  
**discipline**: corporal, 72; parenting styles and, 70–71  
**discontinuous**, 96  
**discrimination**, 238; attractiveness and, 529; case study, 601; defined, 238; gender, 114; prejudice and, 600  
**Disease Model of Alcoholism**, 485  
**disinhibition**, 259  
**disorders**, brain, 161  
**disorganized attachment**, 66, 67  
**disorganized schizophrenia**, 473  
**disorientation and disorganization**, stage of grief, 140  
**displacement**, defense mechanism, 388  
**disposition**, 541  
**dispositional attributions**, 536  
**dissociative amnesia**, 468  
**dissociative disorders**, 468–69  
**dissociative fugue**, 468  
**dissociative identity disorder**, 468  
**distress**, 421  
**distributions**, 43  
**divergent thinking**, 294  
**diversity in psychology**, 20; culturally sensitive research, 35; culture and the individual, 20; eating disorders, 104  
**diverted attention**, 473  
**divisions of the APA**, 21

## electroconvulsive therapy (ECT)

**divorce**: children and, 549–50; as death, 548; marital problems and, 548  
**DNA**: genes and, *d171*; structure of, 171  
**Doll Test**, 592  
**domestic violence**, 578  
**door-in-the-face technique**, 604  
**dopamine**, neurotransmitter, 86–87, 151, 474, 515  
**double approach-avoidance**, 422  
**double-blind experiment**, 35  
**Dove Counterbalance Intelligence Test**, *t363*  
**Down syndrome**, 54, 172  
**dream analysis**, 12, 500–01; Freud and, 183; interpret, 185;  
**dream plans**, 178–79  
**dreams**: content of, 184–85; interpretation, 185; lucid, 187  
**drive**, defined, 317  
**drive-reduction theory**, of motivation, 317–18  
**drug abuse**, 103; aging and, 125; as stress response, 432; treatment and, 198  
**drug addiction**: alcoholism, 484–85; defining, 483–84  
**drugs**, psychoactive, 193  
**drug therapy, defined**, 514, 515. *See also* biological therapy  
**DSM**, axes and, 456–57  
**DSM-5**, 454, 455, 457–58  
**dualism**, defined, 10–11  
**dying**, stages of, 140

## E

**ear: human**, *d216*; structure of, 215  
**eardrum**, 215  
**Early Adult Transition**, 128  
**early maturation** (case study), 91  
**eating disorders**, in teens, 104–05  
**echolalia**, 477  
**eclectic approach**, to psychotherapy, 494  
**Ecstasy**, as designer drug, 197  
**education**, continuing, 115–17  
**education requirements**, in fields of psychology, 619–22  
**Educational Testing Service and College Board**, 363  
**efferent neurons**, 151  
**ego**: defense mechanisms and, 387–89; defined, 386; psychoanalytic theory of personality and, 385–87  
**egocentric**, 62  
**ego-support value**, 528  
**eidetic memory**, 282, 283  
**elaborate processing**, of memory, 275  
**elaborative rehearsal**, of memory, 275, 284  
**electroconvulsive therapy (ECT)**, 517–18

**electrodes**, brain study and, 158–59  
**electroencephalograph (EEG)**, 158–59, 180, 181  
**electromagnetic radiation**, 211–12  
**electromagnetic spectrum**, 211–12, *d212*  
**electrotherapy**, 513  
**eliminate**, 35  
**Emory University**, 168  
**emotion**: culture and, 340; decisions and, 338; defined, 335; learning and, 337; range of, *c335*; theories of, *t341*  
**emotional changes**, adolescence, 84  
**emotional control**, stress and, 436  
**emotional development**: animal experiments, 65–66; infants, 66–67  
**emotional expressiveness**, stress reaction and, 435  
**emotional intelligence**, 335, 356  
**emotional responses to color**, 2  
**emotional stability**, 412–13  
**emotional stress responses**, 430–33  
**emotional support**, 437  
**emotions**: amygdala and, 154; expressing, 334–37; physiological arousal, lie detection and, 339; venting, strategy coping with stress, *t442*  
**emotions, cognitive theories of**: cognitive appraisal theory, 341; opponent-process theory, 341–42; Schachter-Singer experiment, 339–41  
**emotions, identifying**: facial feedback theory, 336–37; threatening elements, *d336*  
**emotions, physiological theories of**, 337–39. *See also* physiological theories of emotion  
**empathy**, 502  
**empirical**, defined, 7–8  
**encoding**, 268, 269  
**endocrine glands**, 164–66; adrenal glands, 165; hormones and, 164; pituitary and thyroid glands, 165; sex glands, 165–66  
**endocrine system**: defined, 164; diagram, *d166*  
**endogamy**, 547  
**engram**, 276  
**enigma**, 407  
**entrenched**, 407  
**environment**: adapting to, 226; defined, 20; factors in aggression, 578; Flynn effect, IQ scores and, 361; intelligence and, 359–61; sleep and, 183; twin studies and, 173  
**environmental psychologists**, 20  
**environmental stressors**, defining, 424–425  
**epidemic**, 332  
**epileptic seizure**, 156  
**epinephrine**, adrenal glands and, 165  
**episodic memory**, 273, 275

**Erikson's theory of psychosocial development**, 74, *d75*  
**Erikson's theory of the identity crisis**, 96–97  
**erratic**, 17  
**escapist reactions to stress**, 432  
**ESP**, 228–29  
**essential features**, 455  
**establishment of limits**, 71  
**estrogen**, 165–66  
**ethical issues in research**, 32  
**Ethical Principles and Code of Conduct (APA)**, 20  
**ethics**, defined, 32  
**ethnic background**: IQ scores and, 362; mental health care and, 516  
**eustress**, 421  
**excitatory neurotransmitters**, 151  
**executive attention component**, 272  
**exercise, stress mitigation and**, 439, 444  
**exhaustion stage, of stress response**, 430  
**expectancy-value theory**, 328–29  
**expectations, placebo effect**, 39  
**experiences, comparing**, 525–26  
**experimental group**, 31–32  
**experimental psychologists**, 21–22  
**experimental research**, *c1*  
**Experiment in the Seventh Century BC, An** (Hunt), 16  
**experiments**: Asch conformity, 566, *d566*; Burger, modified Milgram, 570–71, 574–75; Milgram, 568–70; Oak School, 598; robber's cave, group cooperation, 579–81; Stanford Prison, 571  
**explanatory style, stress reduction and**, 443  
**exposure**: defined, 589; effect, mere, attitude formation and, 590; mere, choosing friends and, 531  
**expression, nonverbal communication and**, 538  
**Expressions of the Emotions in Man and Animals, The** (Darwin), 336  
**external attributions**, 536  
**external locus of control**, 395  
**external validity**, 29  
**extinction**, 238  
**extrasensory perception (ESP)**, 228–29  
**extraversion**: introversion vs., 411; personality and, 383  
**extrinsic motivation**, 319–20  
**extroversion**: introversion vs., 413; personality trait, 412–13  
**extroverts**, 411  
**eye, human**, *d211*  
**eye exams**, 219

**eyewitness**, questionable, 26–27

## F

**Facial Coding System (FACS)**, 337  
**facial expressions**: computer interpretations, 68; facial feedback theory, 336–37; threatening elements, *d336*  
**facial feedback theory**, 336–37, *t341*  
**FACS**, 337  
**factor analysis**, 411  
**failure**, fear of, 327, *ct327*  
**fallacious**, 38  
**family**: interactions, schizophrenia and, 475; parent-child relationships, 542–43; peer groups and, in adolescence, 102; size, IQ and, 360  
**family therapy**, 496–97  
**farsightedness**, 213  
**fear**: anxiety disorders and, 459–60; of failure, 327, *ct327*; losing, *d508*; overcome irrational, 509; as stress response, 430; of success, 327–28; virtual-reality therapy and, 510  
**feedback**, stress and, 436  
**female development**, 130. *See also* gender  
**fetal alcohol syndrome**, 53  
**fetal development**, 53–54; newborn development and, 54; reflexes, 54  
**fields of psychology**, 619–22; clinical psychologist, 621; consulting psychologist, 621–22; crisis hotline adviser, 619–20; grief counselor, 622; human resources director, 621; mental health assistant, 620; school psychologist, 621; substance abuse counselor, 622  
**figure-ground perception**, 223–24  
**financial reward**, job satisfaction and, 118  
**first impressions**, 533–34  
**fixed-interval schedule**, of reinforcement, 248  
**fixed-ratio schedule**, of reinforcement, 247  
**flat affect**, 473  
**flavor**, 217  
**flawed thought processes** (Beck), 403  
**flexibility**, 294; creative thinking, 299  
**flight-or-fright syndrome**, anxiety and, 338, 429, 430, 432–33, *c433*  
**flooding, counterconditioning and**, 509  
**flowering of language**, *c57*  
**flow states**, 189  
**fluid intelligence**, 134  
**fluoxetine**, 515  
**flux**, 353  
**Flynn effect**, IQ scores and, 361  
**fMRI brain scans**, 161, 162; brain-pattern analysis, 187; dreaming and, 186–87  
**Foldit, computer game**, 298

**folic acid**, 160  
**food**, obesity epidemic and, 332–33  
**foot-in-the-door technique**, 567, 604  
**foreboding**, 512  
**forebrain**, 153, 154  
**forensic psychologists**, 21, 619  
**forgetting**, 283; amnesia, 283; interference, 283  
**formal operations stage of cognitive development**, 63, 92, 93  
**Four Humors, The**, 15  
**fragile memory**, 275  
**Frames of Mind** (Gardner), 356  
**Fraser's Spiral**, *d205*  
**fraternal twins studies**, 173–74  
**free association**, 12, 500, 504  
**frequency**, brain wave, 181  
**frequency curve**, 42  
**frequency distribution**, 41–42, *c41*  
**frequency polygon**, 42, *c42*  
**Freudian slips**, *ct386*  
**Freud's five stages of development**, 389  
**Freud's model of ego**, *d385*  
**friends, choosing**: approval and, 530; complementarity, 531; mere exposure, 531; physical appearance, 529; proximity, 527–28; reward values and, 528–29; similarity, 530  
**friends, helping**, 549  
**friends, need for**: about, 523; anxiety and companionship, 525; comparing experiences/reducing uncertainty, 525–26  
**friendship**, peer groups and, 81  
**frontal cortex**, Phineas Gage study, 159  
**frontal lobe dementia**, 159  
**frustration-aggression hypothesis**, 578  
**fully functioning**, 401  
**functional fixedness**, 298; overcoming, *d299–300*  
**functionalism**, 11  
**functionalist**, defined, 11, 12  
**fundamental attribution error**, 536, 537  
**fundamental needs**, 329

## G

**Gallup News Service**, *q615*  
**games and play**, cognitive-developmental approach, 75–76  
**gaming**, benefits of, 302–03  
**gangs**, group aggression and, 580–81  
**Gardner's theory of multiple intelligences**, 355–56, *c357*  
**gateway control theory of pain**, 219  
**gender**: adult stages of development, 130; bias in intelligence testing, 363; body image in adolescence, 88; culture, emotion and, 340;

depression and, 474; fear of success and, 327–28; female development, 130; growth spurts and, 87; hormones, 165–166; language and, 308–10, *ct309*; Levinson's theory of male development, 128–29; moral development and, 78; physical appearance and, 529; sexual changes, aging and, 126; sexual maturation and, 87–88; stress and, 426, 436; stress divides, 438–39; video gaming and, 302  
**gender differences**: in adolescence, 111–12; biological theory, 113; in cognitive abilities, 112; cognitive-developmental theory of, 113–14; psychoanalytical theory of, 113; social learning theory of, 113; verbal communication, 112  
**gender discrimination**, 439  
**gender identity**: androgynous, 110; defined, 108  
**gender role(s)**: in adolescence, 108–10; changing, 114; defined, 109; gender identity and, 109; sociocultural theory, behavior and, 405  
**gender schema**, 114  
**gender stereotypes**, 109, *ct09*; defined, 108–09  
**general adaptation syndrome**, 429–30  
**General Electric**, 36  
**generalization**, 238  
**generalized anxiety disorder**, 459–60  
**generational identity**, 543  
**generation gap**, 543  
**generative-transformational grammar**, 306  
**generativity**, 129  
**genes**, 171; twin studies and, 173  
**gene selection**, 172  
**genetic defects**, 13  
**genetics**: intelligence and, 360; schizophrenia and, 474; weight and, 323–24  
**genital stage**, 73  
**genocide**, 570, 571  
**genotype**: defined, 171; nature vs. nurture, 171–72  
**genuineness**, 502  
**geography**, personality and, 402  
**Georgia Institute of Technology**, 136  
**gerontology**, 438–39; defined, 614  
**Gestalt Principles**, 223, *d223*  
**Gestalt psychology**, 11–12  
**ginkgo biloba**, 286  
**glaucoma**, blindness and, 214  
**glossophobia**, 461  
**glutamate**, 151  
**glutostatic theory**, 323  
**goal-directed behavior**, 328–29  
**Golden Rule**, 77  
**good looks**, as overrated, 99  
**grandeur**, schizophrenia and, 473  
**grasping reflex**, in infants, 54  
**Greeks**: memory and, 285; psychology and, 10

**grief**, dealing with, 140–41  
**grief counselor**, 622  
**group conflict vs. cooperation**: gangs, 580–81; robber's cave experiment, 579–80  
**group polarization**, 560, *d560*

**serotonin reuptake inhibitors (SSRIs)**, 515  
**Sesame Street**, 613  
**set-point**, 323–24  
**settling down structure**, 128, *c129*  
**sex glands**, 165–66  
**sexual activity**, older adults and, 133  
**sexual attitudes**, adolescence and, 89–90

## socialization

**sexual identity**, 109  
**sexually transmitted diseases**, teens and, 90  
**sexual maturation**, of adolescence, 87  
**shallow processing**, memory, 275  
**shape constancy**, *d227*  
**shaping**, operant conditioning, 249  
**shared goals**, groups and, 557  
**shock and numbness**, stage of grief, 140  
**short-term dynamic psychotherapy**, 501  
**short-term memory**, 270–72; chunking and, 271; maintenance rehearsal, 270–71; primacy-recency effect, 272; using, *d271*; working memory, 272  
**shyness**, attribution-theory and, 536  
**sickle-cell anemia**, 53, 172  
**sickness**, as stress response, 433, 438–39  
**sight**, sense of, 210–11  
**signal-detection theory**, 208–09  
**similarity**: choosing friends and, 530  
**simplicity**, 223  
**single-blind experiment**, 34–35  
**situational attributions**, 536  
**skin**, as sensory organ, 218  
**skin color**, bias towards lighter, in children, 592–93  
**Skinner box**, *d246*  
**sleep**: apnea, 183; circadian rhythm, 183; deprivations, hallucinations and, 195; disorders of, 183–84; dream planning, 178–79; lack of, 4; patterns of, *d182*; quantity and quality of, 182–84; REM, 7, 181–83, 185; Sigmund Freud's stages of, *d181*; stages of, 181–82, 184, 443; time spent in, 182; why we need, 180. *See also* dream analysis  
**sleeping effect**, persuasion and, 605  
**sleepwalking**, 184  
**smell**, sense of, 217  
**smoking**, posthypnotic suggestion and, 190  
**social anxiety disorder**, 461  
**social class**, identity and, 128  
**social cognition**, 524, 525  
**social cognitive theory**, 395–96  
**social development**: of adolescents, importance of peer groups, 101; adulthood, 127–30; defined, 72–73; Erikson's theory of psychosocial, 74; Freud's theory of psychosexual, 73  
**social facilitation**, groups and, 559–64  
**social functions**, of groups, 557  
**social group**: attitudes and, 591; endogamy, marriage and, 547. *See also* groups  
**social inhibition**, groups and, 559  
**social isolation**, wild boy of Aveyron and, 17  
**socialization**, 72

## social learning

**social learning**: behavior modification, 260–62; cognitive learning, 256–58; defined, 256, 257; how it works, *c260*; learned helplessness, 258; modeling, 259  
**social learning theory of development**, 99; gender differences, 113  
**social learning view of development**, 98–99  
**social loafing**, 582  
**social media**, addiction to, 450–51  
**social motives, need for achievement and**: fear of failure, 327, *ct327*; fear of success, 327–28; measuring need for, 326  
**social needs**, biological and, *t323*  
**social networking**, groups and, 562  
**social norms**, of groups, 558  
**social perception**: first impressions, 533–34; primacy effect, 534–35; schemas, 535; stereotypes, 535  
**social phobias**, 461  
**social psychologists**, 21  
**social psychology**, 524, 525  
**social readjustment rating scale**, 425–26, 435, *t424*  
**social rules**: body language and, 539; defined, 72  
**social sciences**: defined, 8; psychology as, 9  
**social strategies for stress reduction**: interpersonal skills, improving, 445; support groups/professional help, 444; training, 444  
**social support**: seeking, strategy coping with stress, *t442*; stress control and treatment, 437  
**societal effects**, of alcoholism, 485  
**Society of Observers of Man**, 17  
**Society of Psychological Research**, 615  
**sociocultural**: perspective, on personality, 383; psychologists, 14; theory, of personality, 404–05  
**socioeconomic status**: background IQ scores and, 362; stress and, 426  
**sociogram**, 561, *d562*  
**sociolinguistics**, 308  
**sociopaths**, 483  
**somatic nervous system (SNS)**, 152  
**somatoform disorders**: conversion disorder, 467; defining, 466; hypochondriasis, 467–68  
**somatosensory cortex**, of frontal lobe, 155  
**somesthesia**, 218  
**sound(s)**: learning and, 234–35; memory and, 234; pathway of, 215  
**sound-wave frequency**, 215  
**sound waves**, cochlear implant and, 216  
**source traits**, 411  
**spacing effect**, memory and, 284  
**spatial abilities**, *d112*  
**spatial intelligence**, *c357*  
**spatial relations**, mental ability for, *c355*  
**specific phobia**, 461  
**speech**: brain damage and, 160; innate, 16; telegraphic, 306; wild boy of Aveyron, 17  
**spermarch**, 87–88  
**Spice**, synthetic marijuana, 194  
**spinal cord**, 148, *d149*  
**spirituality**, stress and, 435–36  
**split-brain operations**, 156, 157, 163  
**split-half reliability**, 349  
**spontaneously**, 16  
**sport psychologists**, 19, 619  
**SSRIs**, 515  
**SSRS**. *See* social readjustment rating scale  
**stability vs. change**, 96  
**stability vs. instability**, 411  
**stage I sleep**, 181, 443  
**stage II sleep**, 181  
**stage III sleep**, 181  
**stage IV sleep**, 181, 182, 184  
**stagnation**, 129  
**standard deviation**, 44, *g44*  
**standardization**, 350  
**standardized tests**, 349, 350–51  
**Stanford-Binet intelligence scale**, 357–58; typical items on, *c358*  
**Stanford Prison experiment**, 571  
**Stanford University**, 30, 562, 571  
**startle reflex**, 54  
**state-dependent learning**, 282  
**statistical significance**, 45–46  
**statistics**: descriptive, 40–45; inferential, 45–46; study data, *c41*  
**stereotype**: aging, 131; aging, sexual activity and, 126; defined, 598; race and, 593; social perception, 535  
**Sternberg's theory of intelligence**, 356  
**steroids, endocrine system and**, 164–65  
**stimulants, altered states of consciousness and**, 196–97  
**stimulate**, 156  
**stimulation value**, 528  
**stimuli**: aversive, 252–53; changes in, 208; pain and, 218–19; vestibular responses, 218  
**stimulus**: conditioned, 237; sensation and, 204; unconditioned, 237  
**storage**, 268, 269  
**stranger anxiety**, 66  
**stratified sample**, 29  
**stress**: appraising a situation, 423, *ct423*; conflict situations, 422, *t422*; defining, 420–21; environmental, 424–427; gender and, 438–39; hassles as cause, 427; illusion of, case study, 446; irrational assumptions that cause, *t444*; lab activity, 418–19; life changes and, 425–26; money and, 441; panic disorders and, 462; road rage and, 435; sleep disorders, 184; social

## sympathetic nervous system

support, treatment and, 437; summary model of, *t445*  
**stress, defensive coping strategies for**, *t442*; defining, 440–41; mental strategies, 442–43; physical and social, 443–45  
**stress, factors influencing reactions to**: personality differences, 434–35; spirituality, 435–36  
**stress, responses to**, 428–29; behavioral, 431–32; emotional and cognitive, 430–31; general adaptation syndrome, 429–30; panic attacks, 430; physical reactions, 432–33  
**stress hormones**, 168  
**stressor(s)**: 421, 424–27; environmental, perceived control over, 436–37; schizophrenia and, 475; stress reaction, 421. *See also* stress, environmental  
**stroke**, brain injury and, 161  
**Strong Interest Inventory (SII)**, 367  
**Stroop effect**, 209  
**structuralist**, 8  
**studies, research**, 29–31  
**study**: habits, improving, 261–62; Hawthorn study, 36; memory and, 266, 285–86  
**subfields of psychology**, 19–20  
**subgoals**, 297  
**sublimation**: defense mechanisms, 389; defined, 73  
**subliminal ads**, 225  
**subliminal advertising**, 225  
**subliminal messages**, 225  
**subliminal perception**, 225  
**substance abuse**, strategy coping with stress, *t442*  
**substance abuse counselor**, 622  
**Substance Abuse and Mental Health Services Administration**, 198, 516  
**success**, fear of, 327–28  
**sucking reflex**, 54  
**suggestion**, placebo effect, 39  
**suicide**: assisted, 142; bullying and, 480; depression and, 479–80; rates, *g480*; as stress response, 432; in teens, 103–04; what to do, 479  
**superego**: defined, 386; psychoanalytic theory of personality and, 385–87  
**support groups**, 444  
**suppression of competing activities**, *t442*  
**Supreme Court Decisions**, 563  
**surface processing of memory**, 275
